PROFESSIONAL SUMMARY

Computer Science Engineering student with strong problem solving skills and a passion for technology. Skilled in Cybersecurity, Artificial intelligence and debugging with a quick learning and adaptable mindset. Eager to contribute to innovative and impactful software solutions.

EDUCATION

B.E – Computer Science Engineering	VSB Engineering College, Karur CGPA:8.37	(2023 - 2027)
Higher Secondary Education	SSPG Higher Secondary School, Kumbakonam 82%	(2022 - 2023)
SSLC (10th Standard)	SSPG Higher Secondary School, Kumbakonam ALL PASS	(2020 - 2021)

TECHNICAL SKILLS

Programming Languages: Java

Database: MySQL

WebTechnologies: HTML, CSS

Framework: Basics of Spring Boot

AI skills: Prompt Engineering, Generative AI Fundamentals, AI tools Usage

Tools: Git, Power BI, Postman, Canva

INTERNSHIP EXPERIENCE

Infosys Springboard | Virtual Intern 6.0:

Nov 2025 - Jan 2026

- Built a Java-based Banking Fraud Detection System in an Agile environment for suspicious transaction detection.
- Used rule-based anomaly detection with APIs and dashboards for real-time monitoring.

Fantasy Solutions | Web Development Intern:

Dec 2024 - Jan 2025

- Led a team in building an Agri Predict Platform using Machine Learning for crop prediction.
- Worked on data preprocessing, model training, and visualization using agricultural datasets.

PROJECT

Smart Cyber Incident Reporting and Security Awareness Chatbot

- Implemented a rule based chatbot for cybersecurity awareness and guidance.
- Integrated fake URL detection and cyber incident reporting features.

Tech Stack: Python, Flask, MySQL, HTML, CSS, Javascript

AI-Powered Stray Animal Adoption Platform using RAG

- Implemented a RAG-based chatbot to provide stray animal care guidance and adoption assistance.
- Integrated stray animal reporting, adoption request management, and intelligent response generation features.

Tech Stack: Python, Flask, MySQL, HTML, CSS, Javascript

QR Code-Based Fake Product Detection System

- Implemented QR code scanning and validation for secure product authenticity verification.
- Integrated counterfeit product detection features to improve product security and consumer trust

Tech Stack: Java, Spring Boot, MySQL, HTML, CSS, Javascript

CERTIFICATIONS

- NPTEL Certification in Programming in Java – Gold Elite
- Cisco Certified in Cybersecurity
- Infosys Certified in My SQL Database Management and Artificial Intelligence
- Completed Deloitte Cybersecurity Job Simulation Program
- Typewriting Senior Grade Examination – Secured Distinction

ACHIEVEMENTS

- Solved 100+ problems on LeetCode
- Participated in Capgemini Hackathon
- Published a project paper titled E-Commerce Website with Integrated Virtual Try-On Feature
